TRADE MISSION IN SOUTH AFRICA

Johannesbourg, september 16-18, 2013

mechanical-automation

chemical-farmaceutical

food and beverage

TRADE MISSION IN SOUTH AFRICA is one of the actions of Unioncamere Promotional Program 2013 organized by Aspin, the Special Agency of Frosinone Chamber of Commerce for international Activities, in collaboration with the Italian Chamber of Trade and Industry South Africa in Johannesburg and ICE Office in Johannesburg.

The main target of the Trade Mission is to promote the excellence of Made in Italy in the Republic of South Africa in order to increase the flow of exports of the companies involved in the project, stimulate and encourage the development of new relationships with BRICS Countries and to create favorable conditions for the improvement of trade relations already in place with local partners.

The main fields involved in the trade Mission, according to their economic importance in terms of import/export and the specific needs of the South African market in relation to Made in Italy productions, are:

Mechanics and Automation chain: industrial machinery, including equipment for the apparel and footwear, digger, design, construction and maintenance of industrial plants.

Chemical-Pharmaceutical Supply chain: polymers for industry, health products, medicines.

Food and Beverage chain: fishing and aquaculture technologies for food processing, conservation, organic food, bio-fuels, packaging.

Energia Rinnovabile Italia

Energia Rinnovabile Italia

Company Profile:

Energia Rinnovabile Italia was founded in 2004 for the construction and management of renewable energy installations. It is specialized in the wind sector and, for years, it has built installations for the production of energy from other renewable sources (solar, biomass, biogas). The company ENERGIA RINNOVABILE ITALIA S.u.r.l. is co-owner of the wind farm site in Minervino Murge (BT), established in 2008, currently in operation, consisting in 9 wind turbines for a total power of 18 MW.

PRODUCTS

Construction and management of installations for the production of electric energy from renewable sources (wind, solar, biomass and biogas). The company ENERGIA RINNOVABILE ITALIA S.u.r.l. is able to solve every specialized aspect of the design of renewable energy installations.

FalcoPneus

Company Profile:

FalcoPneus was established in 1996 from an idea by Michele Marmo, trade manager. The firm has 30 years experience in tyre trading; it has direct contact with the major tyre manufacturing companies and it is the wholesaler of Michelin Bridgestone and Vredestein brands. FalcoPneus offers a vast and capillary service to more than 3000 retailers in south Italy (Campania Region, Basilicata Region and Calabria Region). In the last years, the firm has achieved an average sales volume of about € 7.000.000,00 per year, distributing over 120.000 tyres to retailers. FalcoPneus has a b-to-b service that allows clients to order and control the availability in real time.

PRODUCTS

FalcoPneus distributes tires from the best brands, and provides a very wide range for different vehicles. The core business is focused towards car tires and 4x4 tires but the Company treats also machinery, tractors and motorcycles.

Magaldi Power

Company Profile:

Magaldi Group, founded in 1929 in Salerno, is a leading manufacturer of industrial systems and plants for bulk material handling at high temperatures, aggressive chemicals, heavy or sharp products, particularly used for coal-fired power plants, cement industries, mines, metallurgical processes, steel plants, biomasses and foundries. In the field of renewable energy Magaldi Group is developing an innovative concentrated solar power plant.

PRODUCTS

The MAC® (Magaldi Ash Cooler) is a unique system for dry extraction, air cooling and mechanical handling of bottom ash from pulverized coal-fired boilers. The Mac increases boiler efficiency, eliminates environmental risk due to zero water usage and no bottom ash storage ponds.

The Ecobelt® is the solution for Bulk Material Handling in different industries, mining, cement, steel and metallurgical processes. Reliability is the main feature of any Magaldi equipment designed to operate in industrial processes handling hot materials, aggressive chemicals, heavy or sharp products.

Ecobelt WA® recently developed for waste sector uses air instead of water to cool down the incinerator bottom ash, and makes feasible the separation of metals from waste ash, even in microscopic fractions, from inert substances. The recovery of metals from waste is a high-value environmentally and economically practice, since it allows their recycling, saving natural resources. In the field of renewable energy Magaldi Group is developing STEM an innovative concentrated solar power plant.

Meca Trasformatori

Company Profile:

MECA Group has been operating in the field of electromechanics since 1974, bringing energy to the service of companies and industries by building electrical transformers of distribution MV/LV. In the energy sector, mention should be made, first and foremost, of the long relationship with Enel Spa, Eni Spa, Enipower Spa, Tirreno Power Spa, Moncada energy group Srl. MECA group is firmly established and is a company in constant development, both in the acquisition of new markets and in investment in research and training.

PRODUCTS

MECA Group produces ML/LV transformers in mineral oil, with capacities from 25 kVA up to 2.500 KVA and nominal insulation classes up to 36 kv. These types of transformers are used, over various ranges of power, in primary and secondary electrical energy transmission and distribution systems, and in various other industrial applications.

Sautech

Company Profile:

SAUTECH is a young company from South Italy, whose distinguishing features are high technology and professionalism. It was founded in 2006 with its offices situated in Cava de' Tirreni (SA), with the aim to exploit their skills and abilities gained in the context of factory automation, process control and industrial informatics. SAUTECH operates in Italy, in Europe and worldwide: the services provided cover the entire life cycle of plants, ranging from design to engineering, from installation to integration of complete systems offering assistance and advice 365/24/7.

PRODUCTS

SAUTECH offers design, development and commissioning of industrial automation systems, robotics, automated warehouses, remote control systems, traceability systems and construction of electrical systems. It also offers packages and custom-made solutions for IT, Web and e-commerce.

Tecnosystem

Company Profile:

Tecnosystem is an Italian company with over twenty years of experience in handling and plant logistics. Since 1988 it has offered solutions for plant engineering and industrial automation. Its engineering department is specialized in designing, manufacturing and commissioning Material handling systems.

Market and customer needs, and the requests for implementation of its own systems, quickly lead Tecnosystem to develop new and successful solutions also in the sectors of Robotics Applications and Handling Systems, fields in which today Tecnosystem boasts ample references.

Tecnosystem has a team of engineers specialized in designing and manufacturing Special Machines by integrating and expanding its customers' needs and specifications.

PRODUCTS

Tecnosystem can offer customized solutions in the fields of automation, industrial robotics and industrial controls at-large.

Main sectors:

Food Industry; Pharmaceutical Industry; Energy Industry; Electro-mechanical industry; Mechanical Engineering Industry; Ceramics Industry; Chemical Industry; Textile; Brick and Tile Industry; Defense Industry.

Most acknowledged systems are:

Handling and accumulation systems; Product packaging lines; Mechanical assembly lines; Product identification lines; Product sorting lines; Palletizing lines; Pallet changer lines; Logistics and transport lines; Robotic systems; Component assembly machines.

Customers can rely on after-sales customer support services including training for engineers, remote tele-assistance and periodic preventive maintenance programs.

Zambelli Macchine Automatiche

Company Profile:

Zambelli was founded in 1969 as a company to manufacture packaging machines in the mechanical deep-rooted tradition of the city of Bologna. In a few years the success of the technological solutions adopted has crossed the Italian borders and created a customer base of international renown. Zambelli today range of machines is composed by: shrinkwrapping machines, tray-packers, cartoners, case packers, pick & place and robotized palletizer. Zambelli machines are designed to offer reliability, efficiency and flexibility to meet present and future customers' need. Main features delivered by the Zambelli design are: reduced change over time, reduced machine footprint, reduced maintenance costs, higher production efficiency, better quality of the final packs, reduced energy consumption.

PRODUCTS

Zambelli range of machines is composed by:

- shrinkwrapping machines
- tray-packers
- cartoners
- case packers side loading, bottom loading
- wraparound case packers
- pick & place and robotized palletizer

Carind

Company Profile:

Founded in 1988, Carind is a Tissue Paper Converting Company whose plant covers a surface of 12,000 square meters, within an area of 80,000 sqm. Its main activity is focused on the production of tissue paper items for hygienic, sanitary, domestic and industrial applications. Thanks to the high technology and its flexibility Carind Company operates throughout Italy and foreign Countries with an Export rate of 45%. Always careful to safeguard the environment, Carind has installed a photovoltaic system able to ensure, with zero impact, a part of the energetic needs of its production cycles. Over the years it has obtained relevant certifications, such as: ISO9001, ISO 14001, OHSAS 18001, FSC MIX.

PRODUCTS

The main products are: Multi-purpose paper Rolls, Hand Towel Rolls and Center Feed Rolls, Napkins 1-2-3-ply, medical sheets, Interfolded Hand Towel "C" "V" "Z", toilet paper rolls and Jumbo, related accessories and systems.

Panteco

Company Profile:

Since 1993, Panteco has been dedicated to manufacturing water soluble film and bags according to their European and American patents.

The water soluble material is made from PVA (polyvinyl alcohol) film. PVA is a non-toxic environmentally friendly and 100% biodegradable material that dissolves in water. PVA is commonly used in packaging of a variety of goods, such as plant and vegetable seeds, textiles and clothing, unfinished embroidery items, fresh foods and also in making of water soluble laundry bags for better hygiene and easy handling of soiled washable items.

Panteco engages every day to provide an efficient, fast and accurate service to the satisfaction of its customer. Thanks to its experience Panteco knows that today is important to produce a quality product. It chooses Italian or European raw material in order to do a product purely MADE IN ITALY.

PRODUCTS

Panteco realizes water soluble bags, colored and printed. bags are produced in several sizes and in 4 colors: blue, green, red and yellow. Bags contains also heavy garments. Panteco water soluble bags have been also used in the packaging of cement additives to avoid environmental pollution. The company suggested to use PVA bag for the packaging of cement additives. Panteco's film and bags are also used in the agriculture to pakaging insecticides, fungicides, parasiticides. Panteco has developed a particular type of soluble film for the world of embroidery.

Acqua & Terme Fiuggi

Company Profile:

The city and its healing waters have a very ancient origin. In prehistoric times, the valley of Fiuggi was a lake that with the lacustrine sedimentation and volcanism it is in time filled with a layer of silt, clay, tuff and ash. Today, the water flows through the volcanic layer, enriching itself with benefic components: the secret of the properties of Water Fiuggi is thus in its composition. Fiuggi is a precious mineral water and by consuming it daily, it maintains the entire body youthful thanks to its excellent depurative properties.

PRODUCTS

The Fiuggi mineral water is available in three sizes and variations in natural and sparkling. The bottles are made exclusively of glass and formats available are three: 100 cl (33.8 Fl.Oz.), 75 cl (25.3 Fl.Oz.), 50 cl (16.9 Fl.Oz).

Labcaffè

Company Profile:

It all started over half a century ago, when Mr. Domenico Gioia bought from an Italo-American man a grocery, in which he not only sold several products but he was also used to roast raw coffee, to create handcraft blends and handmade packaging. So far, passion and devotion for this activity have not changed: they have favoured the continuous technological innovation research, without omit the usual care that has always marked the company in the creation of very high quality blends.

Thanks to the quality of its products, the company is nowadays present in more than 40 countries of all the five continents, including East Europe, Middle East and Mediterranean area's countries, taking advantage of the opportunities offered to PMI to expand among difficult markets.

In years the company has been subject of several societary transformations and the whole Caffè Domenico Gioia s.r.l. production and commercialization activity has been absorbed by Labcaffè s.r.l., a company of the same group created in 2002 with the purpose to reorganize the distribution of the mother company who works successfully in the field since 1949.

PRODUCTS

Roasted coffee beans, roasted coffee ground, roasted coffee pods and coffee capsules suitable for the Lavazza machines and Nespresso machines. Organic fair-trade coffee and conventional coffee.

PolSELLi

Company Profile:

POLSELLI S.p.A. is the largest and leading independent Italian Milling Industry, with an ultra-modern plant in Italy located in Arce (province of Frosinone), with the brand name "POLSELLI".

The Company produce soft wheat flours for all sectors of both the home and the foreign markets. All our products are milled 100% naturally and do not contain any food enzymes, added gluten or any additives. From these mills national coverage supplies all the bakery and food manufacturing sectors, from the multinational manufacturers to in-store bakeries, caterers and craft bakers.

POLSELLI S.p.A. has worked in the milling business for over 60 years and prides itself on its philosophy of attention to quality. This distinctive trademark guarantees constant high quality for all its products. This results in a precise choice to meet the high quality standards that our customers look for. Thanks to an efficient and state of the art analytical laboratory our flour products are carefully controlled and also allows for select, raw ingredients which include grains and cereals. It is certificated UNI EN ISO 9001-2000 and ISO 22005.

PRODUCTS

Bread: The bread flours are produced with an array of carefully selected grains whose unique flavor can be savored in the final product...

Pastries: This one of a kind flour puts a spin on an ordinary workday in the pastry shop kitchen, with its surprising ability to bring out the flavor of each ingredient...

Pizza: The meticulous selection of grains, the specialized milling, and our company's cooperation with trade associations are just some of the reasons why the pizza flours are the right choice for making a real Italian pizza...

Rustichella d'Abruzzo

Company Profile:

Rustichella D'Abruzzo originates from the ancient artisan factory Gaetano Sergiacomo, founded in Penne (in Abruzzo), in 1924 keeping unchanged the traditional artisan production strictly oriented to the special and regional pasta shapes. Currently the pasta factory is located in Moscufo (Pescara) in a splendid position on the green hills among the olive trees from which Rustichella produces its excellent extra virgin olive oil (standard and D.O.P.).

Artisan pasta differs in many aspects from the industrial products mainly oriented to a mass production and distribution. Three are the fundamental elements that characterize the Rustichella D'Abruzzo pasta: the selection and the utilization of the best durum wheat with a high gluten content and the use of spring water that give the dough a peculiar texture, the exclusive use of bronze dies and the long drying process, carried on up to 50 hours according to the pasta shape and made exclusively at low temperature, around 40°, that guarantees the maintenance of all the organoleptic properties of the pasta.

PRODUCTS

Products on catalogue: durum wheat semolina pasta, organic durum wheat semolina, egg pasta (plain and with flavours) , organic whole wheat pasta, "farro" pasta, kamut pasta, gluten free pasta. Since the beginning of '90s Rustichella decided to widen the products range and offer a complete selection of foods adding on the catalogue artisan sauces, local excellent Extra virgin olive oil (standard and DOP) and a selection of the best gourmet regional products like Panettone, Pandoro, Torrone and Colomba.
